1. Do you think the conceptual design of the Draft Framework works? What would you change?

I believe that a Degree or Postgrad degree in Information Studies/Science is critical to the future of the profession as a prerequisite to ALIA affiliation or eligibility. Nurses for example were only able to be recognised as professionals following the introduction of nursing degrees. Without relevant degrees, the profession will take a back step to the dark ages when librarians were admin workers, shelvers or ... monks!

2. Are there any elements that you would add, amend, or remove?

Please see above.

3. Would a Framework along the lines of the draft Framework be useful to you in your career or workplace? How could you see it being used?

Please see above.

4. Is LIS professional recognition valuable to you? What changes would you like to see to professional recognition?

Please see above.

5. Any other comments?

Please see above.
